### Description

Early thick cast fire register- this beasties face panel is a whopping 8mm thick and very heavy.

The iron has a beautiful olde worlde patina to it, and has a crowned coat of arms cast/sweated onto each corner.

Detailed arch and decorated with cast floral embellishments.

There's a certain something about this one and I think Alan's really underpriced this one- so grab it quick!

Measures 965w by 965H (38" x 38")
